OBJECTIVE

Passionate and detail-oriented Information Technology student with a strong foundation in web development and programming. Excited to apply my technical skills, problem-solving abilities, and creativity in a dynamic internship role where I can contribute to impactful projects and grow professionally.

- PROJECT
- SEA: EVENT ATTENDANCE AND MANAGEMENT SYSTEM

UM Digos College

2023 - 2024

- A simple barcode-scanning platform that makes tracking student attendance at events easy and efficient
 - Includes dynamic countdown timers to keep participants up-to-date on event timings
 - Department-specific scanning ensures only authorized attendees are recorded
 - A smooth, organized way to manage event attendance and keep things running seamlessly
- SHIELD: CONVERGENCE BARANGAY SUPPORT PLATFORM

DILG

2024 - 2025

- A platform designed to track and manage infested areas using QGIS for geospatial analysis
 - Utilizes data analytics to monitor and assess community conditions
 - Integrates with government agencies to provide targeted support and resources
 - Strengthens communities by identifying high-priority areas for intervention
